

b	d
a	c

The image displays four panels (a, b, c, d) for a positional matching activity. Each panel contains six orange cat illustrations. In panels b and d, three cats are crossed out with blue 'X' marks, and one cat is enclosed in a black rectangular box. The cats are arranged in three rows: the top row has one cat, the middle row has three cats, and the bottom row has one cat. The goal is to match the cats in the boxed positions with the correct labels (a, b, c, d) based on their orientation and position.
